SUBJECT INDEX

A

ACTH, and cortisone, in acute rheumatic fever, xix, 2.
Amyloid disease, primary systemic, heart in, xvii, 6.
Anomalies, cardiovascular, see congenital heart disease.
Anticoagulants, in treatment of myocardial infarction, xviii, 12.
Anxiety neurosis, psychiatric evaluation of, xx, 10.
Aortic arches, "vascular rings" and anomalies of, xvii, 8.
Arrhythmias, procaine amide in cardiac, xx, 6.
Atherosclerosis:
- cholesterol metabolism, in relation to, xx, 4.
- coronary, acute and chronic phases, xx, 5.

B

Ballistocardiograph, the use, xx, 1.
Blue babies and well-water, xvii, 10.

C

Cardiac arrhythmias, use of procaine amide in, xx, 6.
Cardiac patient:
- home care program for, xix, 7.
- physician's role in education of, xx, 3.
- psychiatric evaluation of, see anxiety neurosis.
- see also: cardiovascular disease

Cardiac surgery:
- congenital heart disease, in, xvii, 4. xx, 12.
- valvalotomy, selection for, xx, 12.

Cardiovascular disease:
- public health in, xix, 1.
- rehabilitation, and, xix, 12.

Cholesterol metabolism, views on relation to atherosclerosis, xx, 4.
Congenital heart disease:
- diagnostic tests, xvii, 3.
- differential diagnosis from methemoglobinemia, xvii, 10.
- maternal infection, in relation to, xvii, 12.
- physiologic measurements in, xvii, 11.
- recognition of types of pulmonary stenosis, xviii, 7.
- surgery for, xvii, 4.
- "vascular rings" and anomalies of aortic arches, xvii, 8.

Congestive heart failure:
- jaundice in, xviii, 4.
- peripheral mechanisms in, xx, 11.
- refractory, clinical aspects of, xix, 8.
- treatment in the home, xviii, 3.
- venous pressure reduction in treatment of, xix, 6.
- water and sodium imbalance in, xvii, 5.

Coronary atherosclerosis, the acute and chronic phases of, xx, 5.
Cortisone, and ACTH, effects in acute rheumatic fever, xix, 2.

D

Diagnostic methods:
- ballistocardiography, xx, 1.
- electrocardiography, multiple chest leads, xix, 5.

Diagnostic tests:
- in congenital heart disease, xvii, 3.
- pharmacological in pheochromocytoma, xviii, 5.

Dyspnea, the differentiation of cardiac and pulmonary, xvii, 7.

E

Electrocardiography:
- clinical application of, xviii, 8.
- multiple V chest and aV limb leads, xix, 5.

Education, of cardiac patient by physician, xx, 3.

H

Heart disease:
- arteriosclerosis, see atherosclerosis.
- congenital, see congenital.
- hypertensive, see hypertension.
- pregnancy and, xviii, 1 and 2.
- public health in, xix, 1.
- pulmonary complications in, xix, 9.
- rheumatic, see rheumatic fever.
- school-age child, and, xviii, 9.
- vitamin E in treatment of, xviii, 11.

Heart failure, see: congestive heart failure.
Home care, treatment of heart failure through, xviii, 3.
Home care program, treatment of cardiac patients through, xix, 7.
Hyaluronic acid and the rheumatic diseases, xvii, 2.
Hypertension:
- essential prognostic evaluation of, xix, 10.
- malignant, pyrogens in treatment of, xviii, 10.

Hypertensive disease:
- evaluation of therapy, xix, 4.
- veratrum viride in, xx, 2.

Hypotensive state, in myocardial infarction, treatment of, xx, 8.

I

Infarction, see myocardial infarction.

J

Jaundice in congestive heart failure, xviii, 4.

M

Malformations, see congenital heart disease.
Malignant hypertension, pyrogens in the treatment of, xviii, 10.
Maternal infection, relation to congenital heart disease, xvii, 12.
Mitral stenosis, selection of patients for valvulotomy, xx, 12.
Myocardial infarction:
- anticoagulants in treatment of, xviii, 12.
- hypotensive state, treatment of, in, xx, 8.
- oxygen in treatment of, xix, 3.

Myocarditis, due to virus, xviii, 6.

O

Oxygen, therapy in myocardial infarction, xix, 3.

P

Penicillin:
prophylaxis of rheumatic fever, xx, 9.
treatment of cardiovascular syphilis, xvii, 1.
Pericardial paracentesis, xx, 7.
Pericarditis, chronic constrictive, xix, 11.
Pheochromocytoma, pharmacologic tests as aid in diagnosis, xviii, 5.
Physiologic measurements, in cardiac malformation, xvii, 11.
Pregnancy and heart disease, xviii, 1 and 2.
Procaine amide, use in cardiac arrhythmias, xx, 6.
Public health in the cardiovascular disease, xix, 1. see also rehabilitation.
Pulmonary complications in heart disease, xix, 9.
Pulmonary stenosis, clinical recognition of various types, xviii, 7.
Pyrogens, treatment of malignant hypertension, xviii, 10.

R

Rehabilitation and cardiovascular disease, xix, 12.
Rheumatic fever:
cortisone and ACTH in acute, xix, 2.
hyaluronic acid and, xvii, 2.
penicillin prophylaxis, xx, 9.
Rheumatic diseases and hyaluronic acid, xvii, 2.

S

School-age child, heart disease in, xviii, 9.
Sodium, disturbances of, and water balance in congestive failure, xvii, 5.
Syphilis, cardiovascular, penicillin in the treatment of, xvii, 1.
Starvation, cardiovascular effects of, xvii, 9.

T

Therapy, see treatment.
Treatment of heart disease:
ACTH and cortisone, xix, 2.
anticoagulants, xviii, 12.
cortisone, see ACTH.
home care, xviii, 3.
hypertensive heart disease, xix, 4.
myocardial infarction, xvlll, 12.
oxygen in myocardial infarction, xix, 3.
penicillin in cardiovascular syphilis, xvii, 1.
procaine amide in arrhythmias, xx, 6.
pyrogens in hypertensive, xviii, 10.
rheumatic fever, see ACTH.
surgical of congenital heart disease, xvii, 4. xx, 12.
valvulotomy, xx, 12.
veratrum viride, xx, 2.
vitamin E, xviii, 11.

U

Undernutrition, cardiovascular effects of, xvii, 9.
Unipolar leads in clinical electrocardiography, xix, 5.

V

Valvulotomy, selection of patients with mitral stenosis, xx, 12.
"Vascular rings," and anomalies of aortic arches, xvii, 8.
Venous pressure, reduction of, in treatment of heart failure, xix, 6.
Veratrum viride in hypertensive heart disease, xx, 2.
Virus infection, cause of myocarditis, xviii, 6.
Vitamin E, treatment of heart disease with, xviii, 11.

W

Water, disturbances of, and sodium balance in congestive failure, xvii, 5.
